Dr. De'an Yu is a senior scholar of Yi-Ching, Emperor's Classics, and traditional Chinese medical science of more than 30 years. He has created an effective style of natural therapy with the essences of the wisdom of Yi-Ching, traditional Chinese medical science and the science of modern nutrition, which enabled a lot of his patients to win their battles against diabetes, heart disease, hypertension, allergies, and cancer.

He will be sharing with us how he decodes the mystery of our health with the wisdom of Yi-Ching; and it's proved that we can battle chronic diseases without depending on medicines or surgeries.
